

27th CRC REAL WORLD EMISSIONS WORKSHOP

CALL FOR PAPERS

The objective of the 27th CRC Real World Emissions Workshop is to share information about recent and ongoing research on real world emissions. Main topics of interest are:

- Emissions Modeling
- Improving the Emissions Inventory
- Particulate Matter Emissions
- Measurement Methods: Improvements and New Techniques
- Unregulated Emissions
- Inspection/Maintenance (I/M) and OBD
- Fuel Effects on Exhaust Emissions
- Fuel Economy
- Off-Road / Nonroad Emissions

Researchers from twelve foreign countries participated in the 2016 workshop, which was co-sponsored by the California Air Resources Board, the US Department of Energy's National Renewable Energy Laboratory, the South Coast Air Quality Management District, and the US Environmental Protection Agency OTAQ.

If you want to make an oral presentation or present a poster at the workshop, please return the attached application and an abstract to CRC for review by the Organizing Committee. The deadline for applications is **October 27, 2016**. If you would like to present a demonstration at the workshop, please request a demo application (which will also be available at www.crao.org).

Acceptance of abstracts is judged on the basis of content, originality, and relevance to the workshop topics. Presentations can describe works in progress or even planned work if the project is of sufficient scope and relevance. Preference is given to talks containing new research results. Presentations should not be of a marketing or promotional nature.

Further instructions for preparing an abstract will be available at www.crao.org. The Coordinating Research Council assumes the right to publish or reproduce the abstracts and presentations given at the Real World Emissions Workshop on the CRC website, conference proceedings, and to summarize these materials in articles for other publications.

This year's Workshop will feature a special competition for posters presented by students. If the abstract pertains to research performed predominately by a student researcher, please indicate so in the abstract and on the abstract application. Students authoring posters that have been accepted for the Workshop competition, ***that will still be in school during the Workshop***, will qualify for a discounted registration fee of **\$150 plus an additional \$25 for the networking dinner**.

If you do not plan to present a paper or poster, but would like to attend the workshop, you can register by completing the attached registration form. Online registration will available at www.crao.org shortly. A preliminary agenda is expected to be available on our website by early January 2017.

March 26-29, 2017
Renaissance Long Beach Hotel
Long Beach, California
Deadline for Receipt of Abstracts is October 27, 2016.

Call 678-795-0506 with questions.
